

Tips to Reduce Drug Costs

Review Medications Every Six Months

Eliminate unnecessary drugs (and lower your risk of side effects and drug interactions) by reviewing medications with your physician or pharmacist.

Talk with Your Doctor about Cost

Let your doctor know that cost and therapeutic effectiveness both matter. Ask if there is a generic or lower-cost substitute available.

Shop around and Compare Prices

Look in supermarket pharmacies, chain pharmacies, independent pharmacies, and Sav-Rx mail order pharmacy.

Avoid Free Samples

Free samples are usually brand name and more expensive in the long run.

Ask your Pharmacist for Guidance

Pharmacists can be helpful in guiding you and identifying other options if you are unable to afford your medications.

Ask for Smaller Amounts of New Meds

Consider asking your doctor for a smaller quantity of a new medication until you know it is right for you. This is especially helpful if you are paying cash or have a high copay.
