Responding to the Coronavirus (COVID-19) Retired Members on UnitedHealthcare Coverage

Testing and Treatment of COVID-19

Through May 31, 2020, you pay nothing for either the testing or treatment of COVID-19.

Telehealth Visits

You can save time and get the care you need without having to schedule an in-person doctor's appointment, or be exposed to or expose others to illnesses while sitting in a doctor's waiting room by using Virtual Visits. **Under your UnitedHealthcare coverage, you pay nothing for these visits.**

Virtual Visits enable you to video chat with a provider from your webcam-enabled computer, tablet, or smartphone—any time, day or night. Virtual doctor visits are appropriate for minor health care concerns such as cough/cold, allergies, or fever. Virtual behavioral health visits are appropriate for behavioral health concerns such as addiction, stress and anxiety, or depression and mood.

If you have not already, you will need to set up your **myuhc.com** account to use Virtual Visits.
